But more than flying daggers and mystic dragons that give eternal life, there is more to Asia than meets the eye. Asia is one of the most massive continents in this tiny little planet. Liberation Paccar Mx340 Euro 5 Engine Workshop Manual ~Patients of acupuncture typically experience very minimal or no pain at all, however most of the points are located near nerve endings and muscle tissues. As the needles are embedded in the body, signals are sent to the brain thus promoting the release of endorphins from the pituitary gland.

There are also other points in the body that serve as gateways for better weight management. One of these placements promotes a decrease in an individual's appetite, while another has the ability to reduce water retention in the body. The acupuncturist may choose a multi-targeted approach, depending on the requirements of the patient.

But there are certain drawbacks in using women models in some advertisements and if a consumer is smart enough, it won't take time for him to realize that. It is totally irrelevant to feature a female model or an actress in advertisement promoting men products. Some good examples of this point are showing a woman in axe deodorant commercial and comparison of a partially nude woman's body to the body of a car. Second drawback is due to more concentration on the model, the attention deserved by the product is not sufficient. The main focus of the advertisement is lost.

Surprisingly only few male models advertises for male oriented products. Even a picture of a woman on an Internet commercial seems not logical to some extent, as there are thirty percent of female internet users and seventy percent of male internet users, worldwide. To add to it, advertisers cannot explain why beautiful bodies bring success to advertisement.

Advertisements are convincing and motivating tool, which can leave a deep impact on the minds of the viewers and plays a major role in molding the culture and attitude of the people. Expansive and extensive portraying of women in this manner merely reduces their image to an object of passion. Emphasis is laid only on the physical beauty of the woman like features, body curves. After the commercial has been shot, using graphical technology, any kind of

imperfection of the body is altered which in a way sends out the signal that only perfect people are meant to use the product.

Every person should get STD checkups as frequently as possible, irrespective of being sexually active or not, after they turn into adolescents. Precaution must also be taken when getting injected by an intravenous drug, that the needle used to inject must be sterile. The adolescent must be educated about the symptoms and risks of sexually transmitted diseases.

Adolescents must be thoroughly informed even if they say they know it all. They must be asked to indulge in only safe sex, if doing so. Parents should talk honestly and calmly about safe sex and must answer all their child's queries. Topics such as STDs, birth control methods, having sex because of peer pressure, and date rape must be discussed in detail. Most people think that kissing is safe, but it can spread the sexually transmitted disease, herpes and many other diseases. Condoms do not provide hundred percent protections for genital warts, AIDs and genital warts. Females shouldn't douche as it can make the infection go deeper into the reproductive tract and can also wash off spermicidal protection. There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss.

Parents play a vital role in determining the problem. They should constantly observe their

child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.

What is acupuncture?

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditonal Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

Basic Procedure

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the bodys natural painkillers called endorphins are released, thus helping with pain relief.

After school programs and discipline

How important is discipline when it comes to after school programs? Since most of the activities are recreational, does a program have to adhere to strict rules? Discipline is just as important here as it is in activities that pertain to the school. The child is sent to a program

because you want him to learn more. Discipline in one form or the other is necessary to facilitate learning.

Every program should begin by laying down the rules. The supervisor or teacher should explain each rule and can thus prevent future mishaps. Misbehavior should be addressed as and when it occurs. Deal with the problem in such a manner that it causes the least disruption. It is unwise to turn a blind eye to misbehavior because it catches on like fire, and soon you will have a bunch of unruly children on your hands. Besides, however much they resist it, children like to operate within the safety net of strict guidelines and rules.

When a child misbehaves, it is mostly due to a craving for attention. A supervisor should observe the children and find out what the child wants. Talk to the child so that you can understand what he or she wants. Appropriate disciplinary measures should be taken if there are no apparent reasons for bad behavior.

Concepts Paccar Mx340 Euro 5 Engine Workshop Manual ...Positive augmentation of critical skills is the prime focus of these school-based after school activities. Thus they enhance the skill level of the child. Most school-based programs offer assistance in math tutoring, reading, comprehension and problem solving. Many programs provide engaging activities that seek to prepare the students for college. Hands-on experience is provided for children who want to invest in a career in teaching. Access to telecommunication and technology and involvement in music and art are other benefits of these programs. This becomes invaluable, especially in low-income sectors where such activities are considered to be a luxury.

As far as children are concerned, the snacks provided in after school programs are an added incentive. School sponsored after school programs are entitled to receive funds for snacks. The National School Lunch Program is designed to do just this. Free or reduced price snacks will be provided for children from schools that apply for it. The CACFP reimburses expenditure depending upon the child's income status. But this is applicable only till the age of 13. The funding that schools get depends upon the area in which they are situated. A low-income area gets more funding. Supper can be served to children below the age of 19. Longer programs can provide both supper and a snack. With the participation of non-profit private organization, it is possible to feed deserving school children breakfast, supper and a snack.

Reward success:

When a child achieves something, it is necessary to praise his hard work. Positive reinforcements enhance confidence and increase self-esteem. Conversely, beware of criticism. It can ruin the frail ego of children and play havoc with their minds.

Need for after school activities

When children are literally up to their gills with the learning and sport activities in school, it may seem superfluous to enroll them for after school activities. In spite of this, after school programs are sprouting up in large numbers and most of these are booked full. This shows that there is a real need for after school activities.

The unavailability of parental supervision is the leading cause for the surge in after school

programs. It is seen that many children spend about 20-25 hours a week unsupervised and alone at home. And as the saying goes, "An idle mind is a devils workshop". Children who are left alone to contend with too much free time invariably fall into the wrong company. Drug abuse, alcohol, tobacco and crime come knocking at their doors sooner rather than later. Parents enroll children to various after school programs to keep them occupied in a productive manner. This way, the kids are free to enjoy themselves in a supervised activity.
