Deep Energy Retrofit Guide for Public Buildings

2019-04-10 Rüdiger Lohse This book provides detailed information on how to set up Deep Energy Retrofits (DERs) in public buildings, and shares in-depth insights into the current status of the major technologies, strategies and practical best practice examples of how to cost-effectively combine them. Case studies from Europe are analyzed with respect to energy use before and after renovation, reasons for undertaking the renovation, co-benefits achieved, resulting cost-effectiveness, and the business models employed. The building sector holds the potential for tremendous improvements in terms of energy efficiency and reducing carbon emissions, and energy retrofits to the existing building stock represent a significant opportunity in the transition to a low-carbon future. Moreover, investing in highly efficient building materials and systems can replace long-term energy imports, contribute to cost cutting, and create a wealth of new jobs. Yet, while the technologies needed in order to improve energy efficiency are readily available, significant progress has not yet been made, and “best practices” for implementing building technologies and renewable energy sources are still relegated to small “niche” applications. Offering essential information on Deep Energy Retrofits, the book offers a valuable asset for architects, public authorities, project developers, and engineers alike.

Labor, Global Supply Chains, and the Garment Industry in South Asia

2019-06-27 Sanchita Banerjee Saxena This book argues that larger flaws in the global supply chain must first be addressed to change the way business is conducted to prevent factory owners from taking deadly risks to meet clients’ demands in the garment industry in Bangladesh. Using the 2013 Rana Plaza disaster as a departure point, and to prevent such tragedies from occurring in the future, this book presents an interdisciplinary analysis to address the disaster which resulted in a radical change in the functioning of the garment industry. The chapters present innovative ways of thinking about solutions that go beyond third-party monitoring. They open up possibilities for a renewed engagement of international brands and buyers within the garment sector, a focus on direct worker empowerment using technology, the role of community-based movements, developing a model of change through enforceable contracts combined with workers movements, and a more productive and influential role for both factory owners and the government. This book makes key interventions and rethinks the approaches that have been taken until now and proposes suggestions for the way forward. It engages with international brands, the private sector, and civil society to strategize about the future of the industry and for those who depend on it for their livelihood. A much-needed review and evaluation of the many initiatives that have been set up in Bangladesh in the wake of Rana Plaza, this book is a valuable addition to academics in the fields of development studies, gender and women’s studies, human rights, poverty and practice, political science, economics, sociology, anthropology, and South Asian studies.

Energy Management in Industry

2013-12-17 David Thorpe Energy demand reduction is fast becoming a business activity for all companies and organisations because it can increase profits regardless of the nature of their core activity. The International Energy Agency believes that industry could improve its energy efficiency and reduce carbon dioxide emissions by almost a third using the best available practices and technologies. This guide looks at the many ways available to energy managers to achieve or even exceed this level of performance, including: base-lining consumption planning a monitoring and verification strategy metering (including smart, wireless metering) energy supply management motors and drives compressed air and process controls. Uniquely, it includes a whole chapter on greening data centres. It also looks at topics covered in greater detail in its companion volume, Energy Management in Buildings: insulation, lighting, renewable heating, cooling and HVAC systems. Further chapters examine minimising water use and how to make the financial case, both to prioritise measures for cost effectiveness, and to get management on board. This title is aimed at all professional energy, industry and facilities managers, energy consultants, students, trainees and academics and can be read alongside training for ISO 50001 - Energy Management Systems. It takes the reader from basic concepts to the latest advanced thinking, with principles applicable anywhere in the world and in any climate.

Finding Mecca in America

2012-12-18 Mucahit Bilici The events of 9/11 had a profound impact on American society, but they had an even more lasting effect on Muslims living in the United States. Once practically invisible, they suddenly found themselves overexposed. By describing how Islam in America began as a strange cultural object and is gradually sinking into familiarity, Finding Mecca in America illuminates the growing relationship between Islam and American culture as Muslims find a homeland in America. Rich in ethnographic detail, the book is an up-close account of how Islam takes its American shape. In this book, Mucahit Bilici traces American Muslims' progress from outsiders to natives and from immigrants to citizens. Drawing on the philosophies of Simmel and Heidegger, Bilici develops a novel sociological approach and offers insights into the civil rights activities of Muslim Americans, their increasing efforts at interfaith dialogue, and the recent phenomenon of Muslim ethnic comedy. Theoretically sophisticated, Finding Mecca in America is both a portrait of American Islam and a groundbreaking study of what it means to feel at home.

Trust No Aunty

2017-08 Maria Qamar Based on her popular Instagram @Hatecopy and her experience in a South Asian immigrant family, artist Maria Qamar has created a humorous, illustrated "survival guide" to deal with overbearing "Aunties," whether they're family members, annoying neighbors, or just some random ladies throwing black magic your way. We've all experienced interference from our Aunties—they are at family parties and friendly get-togethers, finding ways to make your life difficult, trying to get you to marry their sons, and telling you to lose weight while simultaneously feeding you a second dinner—and it has stunted our social growth and embarrassed us in front of our friends and cool cousins for years. This tongue-in-cheek guide is full of advice designed to help you manage Aunty meddling and encourages you to pursue your passions—from someone who has been through it all. Qamar confesses to throwing sweatshirts over crop-tops to get out of the house without being questioned, hiding her boyfriend in a closet, and enduring overbearing parents endlessly pressuring her to become a doctor, lawyer, or engineer. Holding onto your cultural identity is tough. Always interfering Aunties make it even harder. But ultimately, Aunties keep our lives interesting. As an Aunty-survivor and a woman who has lived the cross-cultural experience, Qamar defied the advice of her aunties almost every step of the way, and she is here to remind you: Trust No Aunty.

Financing Energy Efficiency

1986

Public Procurement of Energy Efficiency Services

2009-12-17 Jas Singh The current universal concerns about global energy security, competitiveness, and environmental protection make energy efficiency more important than ever. However, realizing large-scale savings has proven a significant challenge due to many barriers. 'Public Procurement of Energy Efficiency Services' looks at a largely untapped energy efficiency market the public sector. While the efficiency potential in this sector is substantial, the implementation of energy savings programs has been complicated by a number of factors, such as insufficient incentives to lower energy costs, rigid budgeting and procurement procedures, and limited access to financing. The book looks at energy savings performance contracts (ESPCs) as a means of overcoming some of these barriers. Because public facilities can outsource the full project cycle to a commercial service provider, ESPCs can enable public agencies to solicit technical solutions, mobilize commercial financing, and assign performance risk to third parties, allowing the agency to pay from a project's actual energy savings. The recommendations in this book stem from case studies that identified approaches, models, and specific solutions to ESPC procurement, including budgeting, energy audits, and bid evaluation. Such an approach also offers enormous potential to bundle, finance, and implement energy efficiency projects on a larger scale in the public sector, which can yield further economies of scale. ESPCs can also serve as an attractive element for fiscal stimulus packages and efforts by governments to 'green' their infrastructure, which can create local jobs, reduce future operating costs, and mitigate their carbon footprint. Lower energy bills, in turn, help to create fiscal space in future years to meet other critical investment priorities. Bundled public sector energy efficiency projects can help stimulate local markets for energy efficiency goods and services and 'lead by example', demonstrating good practices and providing models to the private sector.

Innovative Tools and Methods Using BIM for an Efficient Renovation in Buildings

2022-06-30 Bruno Daniotti This open access book describes a BIM-based toolkit that has been developed according to the latest research activities on building information modelling and semantic interoperability to optimize the building process. It highlights the impacts of using such new tools to fast renovation activities starting from the decision-making and design stages to the construction site management with the possibility to monitor occupants' and owners' feedback during the realization process. In this process, a framework has been developed and implemented to allow stakeholders involved in a renovation project to efficiently compile, maintain, and add data about (i) building elements, (ii) building services systems, (iii) tenants, operators, and owners of the building, and (iv) current and predicted performance of the building from the various data sources available. The framework applies and specializes the existing practices in the Semantic Web, Linked Data, and ontology domain to the management of renovation projects. It has been designed to be open so that any system which implements the required functions and uses the specified conventions will be able to achieve semantic interoperability with other framework-compliant systems in the renovation domain. Finally, this book represents the validation process of the toolkit that has been held in three demo sites: a social housing building in Italy and two private residential buildings in Poland and Finland. The outcome shows that the toolkit facilitates the renovation process with relevant reductions of time, costs, and energy consumption and that the inhabitants can take advantage of the increase in building performances, quality, and comfort.

Uproarious

2019-12-17 Cynthia Willett A radical new approach to humor, where traditional targets become its agents Humor is often dismissed as cruel ridicule or harmless fun. But what if laughter is a vital force to channel rage against patriarchy, Islamophobia, or mass incarceration? To create moments of empathy and dialogue between Black Lives Matter and the police? These and other such questions are at the heart of this powerful reassessment of humor. Placing theorists in conversation with comedians, Uproarious offers a full-frontal approach to the very foundation of comedy and its profound political impact. Here Cynthia Willett and Julie Willett address the four major theories of humor--superiority, relief, incongruity, and social play--through the lens of feminist and game-changing comics such as Wanda Sykes, Margaret Cho, Hannah Gadsby, Hari Kondabolu, and Tig Notaro. They take a radical and holistic approach to the understanding of humor, particularly of humor deployed by those from groups long relegated to the margins, and propose a powerful new understanding of humor as a force that can engender politically progressive social movements. Drawing on a range of cross-disciplinary sources, from philosophies and histories of humor to the psychology and physiology of laughter to animal studies, Uproarious offers a richer understanding of the political and cathartic potential of humor. A major new contribution to a wider dialogue on comedy, Uproarious grounds for us explorations of outsider humor and our golden age of feminist comics--showing that when women, prisoners, even animals, laugh back, comedy along with belly laughs forge new identities and alter the political climate.

Energy Efficiency

2016-04-29 Steven Fawkes Energy risk has reappeared on the corporate and social agenda with a bang and the complexity of the issues has increased many-fold since the days of the last great wave of concern following the oil crises of the 1970s. Steven Fawkes' Energy Efficiency is a comprehensive guide for managers and policy-makers to the fundamental questions underpinning energy-efficiency and our responses to it: ¢ what

do we really mean by energy efficiency? ¢ what is the potential (in different dimensions)? ¢ why it is important? ¢ what management processes lead to optimisation of energy efficiency? ¢ what technologies are useful for improving energy efficiency? ¢ what policies can be used to promote energy efficiency? ¢ how can energy efficiency be financed? ¢ how can energy suppliers engage with energy efficiency? Electricity Demand Reduction

2012-11-29 Great Britain: Department of Energy and Climate Change The Government is putting in place policies aimed at driving down energy bills for consumers, reducing input costs for industry, cutting carbon emissions and contributing to a more competitive economy. Electricity demand reduction (EDR) measures are a crucial part of delivering potential. Already developed policies include the flagship Green Deal and new domestic Energy Company Obligation. These, together with the deployment of smart meters, are expected to reduce electricity consumption by nearly 6.5TWh

by 2030. In addition, the Green Investment Bank will support access to finance and, in time, audits required under the new EU energy efficiency directive will further reduce demand. However, the Department believes that above and beyond existing policies, it should be possible to reduce demand even further. If a 10% electricity demand reduction could be achieved, this could result in electricity system costs savings in the region of £4 billion in 2030. This consultation opens up a range of options to unlock the energy savings that are currently embedded in the system and seeks views on a number of market-wide financial incentives. Publishing simultaneously to the consultation are a consultation summary document (Cm. 8492, ISBN 9780101849227); Electricity market reform policy overview (Cm. 8498, ISBN 9780101849821); Energy security strategy (Cm 8466, ISBN 9780101846622); Annual energy statement 2012 (Cm. 8456, ISBN 9780101845625); and Statutory security of supply report (HC 688, session 2012-13 ISBN 9780102980691)

No Land's Man

2014-11-04 Aasif Mandvi The actor shares a heartfelt “collection of humorous essays that explore his myriad identities: Indian, Muslim, British, and American” (The Boston Globe). “My father moved our family to the United States because of a word. It was a word whose meaning fascinated him. It was a singularly American word, a fat word, a word that could only be spoken with decadent pride. That word was . . . Brunch! “The beauty of America,” he would say, “is they have so much food, that between breakfast and lunch they have to stop and eat again.”—from “International House of Patel” If you’re an Indo-Muslim-British-American actor who has spent more time in bars than mosques over the past few decades, turns out it’s a little tough to explain who you are or where you are from. In No Land’s Man Aasif Mandvi explores this and other conundrums through stories about his family, ambition, desire, and culture that range from dealing with his brunch-obsessed father, to being a high-school-age Michael Jackson impersonator, to joining a Bible study group in order to seduce a nice Christian girl, to improbably becoming America’s favorite Muslim/Indian/Arab/Brown/Doctor correspondent on The Daily Show with Jon Stewart. This is a book filled with passion, discovery, and humor. Mandvi hilariously and poignantly describes a journey that will resonate with anyone who has had to navigate his or her way in the murky space between lands. Or anyone who really loves brunch. “Best Comedy Books of 2014” selection by The Washington Post Praise for No Land’s Man “I was enthralled . . . Mandvi writes beautifully and comedically about his life, with wonderful dialogue and revealing detail, reminiscent of David Sedaris.” —Jonathan Ames, author of Wake Up, Sir! “It always bothered me that Aasif was more than merely funny—he’s also a great actor. Now I’ve learned

he's an amazing storyteller as well, and I am furious . . . but also grateful. Aasif's movement between cultures and genres is what makes him and his story singularly funny, poignant, and essential." —John Hodgman, author of *The Areas of My Expertise* and *More Information Than You Require*
"Aasif is my favorite Indo-Muslim-British-American Daily Show correspondent ever. I loved *No Land's Man!*" —Jim Gaffigan, author of *Dad Is Fat* and *Food: A Love Story* "A lighthearted but heartfelt portrait of Mandvi's childhood and his struggles to come to terms with his rather complicated life."

Quick Reference Manual Template Mandv .Tran racial adoption is where a colored child is placed with white parents. Hoping that the color difference would not match up to the love and belonging the child would feel with its new family. There are fewer young white children available for adoption, leaving adoptive parents feeling the need to reach out and help any child in need, regardless of race. There are different opinions on Tran racial adoption, one is that a child should be put in a home with at least one parent of the same race. Others believe that race should not be considered at all.

To prepare for adoption it is important for everyone, but even more important if you're contemplating Tran racial adoption to consider a few things. When thinking of Tran racial adoption one should think about your personal beliefs and your attitude toward race and ethnicity. When you adopt a child who is considered different, the entire family will be different. One needs to remember that to some, different is strange and sometimes scary. Not everyone will understand your decision to adopt Tran racially. Here are a few more things to ask yourself, where you live, is it integrated? Are the schools in your area integrated? Do you have friends that are different races and ethnicity?

To Tran racially adopt you need to become seriously involved in parenting, you can not allow racially or ethnically prejudice remarks in your

home. You will need to encompass your family with support. You should celebrate all cultures and do not be afraid to discuss race and culture. Most importantly you should be there for your child and let them know that no matter what someone says to them and no matter how bad it hurts them that you are there for them and that you love them. Parents of Tran racial adoption should encourage themselves and allow themselves to believe strongly that their family belongs together. You should make it very clear that it is not ok to make fun of people who are different. Teach your child to stand up to prejudice without starting fights. They should learn to use their words not their fists.

Legend Quick Reference Manual Template Mandv .The profit & loss of a certain company is determined by finance professionals through accounting. They can determine what created the profits as well as the losses. Accountants form some sort of business equation so justify the profits & losses of a business. By doing so, they can easily tell a company's net worth.

It seems that by simply starting to define one accounting term, it eventually leads to defining other terms as well. Net worth is another term that is quite difficult to understand. It refers to the resulting amount after deducting the liabilities of a company from the assets. Private companies refer to net worth as owner's equity.

Why owner's equity? Well, after deducting all the liabilities, what's left basically belongs to the owner. In the case of public companies, the profit of the business is returned as dividends to shareholders. As you can see, before owner or shareholders of a company can take hold of the profits, all liabilities must be deducted first.

International adopting means that we have to follow the rules and laws of our country and the country that we are adopting from. Every country has conditions like age limits, income guidelines, number of children in the home, marital stability, and gender (single applicants). The steps for an international adoption can be difficult. First you need to decide what country in which you would like to adopt. You should think about the cultural differences and weather or not you can really deal with them. Consider your family and friends, talk with them and ask them what their opinions and thoughts on the matter might be. You might ask them how they might feel about it. Your age and marital status will help you know what countries you can adopt from. Once you have done that then you can narrow it down to one.

Once you have chosen a country, you will need to choose an agency that can help you along the way. You should remember when choosing an agency you need to feel comfortable about the people that you will be working with. You also need to make sure that the agencies you are looking at handle international adoptions. Once you have picked your agency it is time to start the paperwork. The agency will assign a social worker to your case. The social worker will come to your home and interview you and any children in your home. They will also want to interview your friends and family. This is called an international home study.

Best Seller : Quick Reference Manual Template Mandv -If you are someone you know will be needing to use an air ambulance service, there are numerous factors to consider before making the trip. One factor to consider when flying in an air ambulance is the aircraft. If the patient must travel by air over a distance of 500 miles, then it is advisable to transport the patient in a jet. Before selecting any air ambulance service that uses jets to transport their patients, check to see if the aircrafts are equipped with RVSM.

What does RVSM mean? The letters RVSM are an abbreviation for Reduced Vertical Separation Minimum. RVSM is a modification to the jet aircraft that has been required by the FAA on all aircrafts that want to fly above 29,000 feet in the air. Despite the FAA regulation since January of 2005, many pilots have chosen not to make this modification to their jet aircraft. Without RVSM, pilots are forced to fly their aircraft at lower altitudes.

For personal flights, flying at lower altitudes is primarily a minor inconvenience, but when traveling for medical necessity by air ambulance, the situation changes. Patients flying on an air ambulance jet are in need of comfort, safety, and speed. The lack of RVSM requiring flight at lower altitudes compromises the patients comfort and the speed of the flight.

The credibility attained by CAMTS certification is prestigious among

other medical transport companies and the public.

Customers will note the CAMTS certification and know that they are securing a flight with a dependable air ambulance service. The commitment to excellence seen only by CAMTS certified companies will provide confidence to the customer. During stressful times, it can be hard to know that you are making the right decision about medical issues, but choosing a CAMTS certified air ambulance will make the decision easier.

Because no federal or state regulations exist to standardize many of the practices associated with air ambulance transport, it is difficult to determine which companies are best and which companies simply will do the job. CAMTS certified companies are required to meet minimum standards that indicate the company is providing excellent service that focuses on patient comfort and safety.
