*The Atmosphere and Ocean*

1997-06-04 Neil Wells This book is unique in bringing together the diverse concepts and ideas of meteorologists, atmospheric physicists and oceanographers into a single coherent account of the fluid environment, with emphasis on their physical properties and inter-dependence rather than on the mathematics. It provides an up-to-date appreciation of the subject area with reference to major research programmes in Oceanography and Meteorology, and an invaluable combined perspective for undergraduates who tend to compartmentalise themselves. It also shows the way the subject is currently developing and suggests possible future research.

## Landscapes and Landforms of Italy

2017-05-23 Mauro Soldati The book deals with the most striking landscapes and landforms of Italy. Attention is given to landform diversity and landscape evolution through time which has been controlled by very diverse geological conditions and dramatic climate changes that have characterized the Italian peninsula and islands since the end of the last glaciation. In addition, various examples of human impact on the landscape are presented. Landscapes and Landforms of Italy contains more than thirty case studies of a multitude of Italian geographical landmarks. The topics and sites described in this book range from the Alpine glaciers to the Etna and Vesuvius volcanoes, taking into account the most representative fluvial, coastal, gravity-induced, karst and structural landscapes of the country. Chapters on the geomorphological landmarks of the cities of Rome and Venice are also included. The book provides the readers with the opportunity to explore the variety of Italian landscapes and landforms through informative texts illustrated with several

color maps and photos. This book will be relevant to scientists, scholars and any readers interested in geology, physical geography, geomorphology, landscape tourism, geoheritage and environmental protection.

### **Climate Change and Climate Modeling**

---

2010-12-16 J. David Neelin Provides students with a solid foundation in climate science, with which to understand global warming, natural climate variations, and climate models. As climate models are one of our primary tools for predicting and adapting to climate change, it is vital we appreciate their strengths and limitations. Also key is understanding what aspects of climate science are well understood and where quantitative uncertainties arise. This textbook will inform the future users of climate models and the decision-makers of tomorrow by providing the depth they need, while requiring no background in atmospheric science and only basic calculus and physics. Developed from a course that the author teaches at UCLA, material has been extensively class-tested and with online resources of colour figures, Powerpoint slides, and problem sets, this is a complete package for students across all sciences wishing to gain a solid grounding in climate science.

### **Blender Videocorso. Modulo base volume unico**

2014-08-05 Andrea Coppola 3 ore di videolezioni! Questo volume contiene le tre lezioni che compongono il modulo base del videocorso Blender. Videocorsi in ebook: una modalità integrata per la fruizione di contenuti testuali e audio/video. All'interno dell'ebook trovi i link per i video in streaming e il testo riguardante la lezione. Puoi inoltre effettuare il download completo di tutti i video (180 minuti totali), per visualizzarli separatamente e autonomamente, andando alla sezione dedicata. Nella prima lezione, suddivisa in cinque parti, affronteremo dapprima l'interfaccia del programma, con una disamina degli strumenti di lavoro e, in particolare, della 3D view. Parleremo poi delle due modalità dell'ambiente di lavoro che verranno utilizzate in questo videocorso: la Object mode e la Edit mode. Approfondiremo un particolare processo di deformazione denominato estrusione, per poi operare un'analisi dei loop, importanti funzioni base. Ampio spazio sarà dedicato alle curve di Bézier, per poi soffermarci sulle sidebar. Creeremo quindi un primo, semplice oggetto, mettendo in pratica quanto affrontato. Nella seconda lezione entreremo nel vivo degli interventi e delle operazioni di modifica sugli oggetti, analizzando accuratamente i principali modificatori e gli effetti della loro applicazione. Proseguiremo con l'inserimento di oggetti e passeremo ad applicare due modificatori: Array, per creare copie o ripetizioni dell'oggetto, e Bevel, per smussare e arrotondare. La seconda parte sarà interamente incentrata sull'impiego dei modificatori che intervengono sulla geometria degli oggetti. Nella terza parte vedremo in azione i modificatori di tipo deform. Nell'ultima parte della lezione svolgeremo un esercizio riassuntivo, utile per acquisire una maggiore padronanza nell'impiego degli strumenti analizzati. Nella terza lezione affronteremo alcuni importanti aspetti concernenti il rendering fotorealistico dei nostri oggetti. Nella prima parte ci occuperemo della scelta e applicazione dei materiali. Passeremo poi a introdurre il motore di rendering Cycles e il metodo dei nodi. Parleremo quindi del cosiddetto Displacement map, dell'Alpha Mapping e dell'UV Mapping, strumenti ausiliari per migliorare il risultato del nostro lavoro. Nella seconda parte focalizzeremo l'attenzione sull'illuminazione, sulle impostazioni della camera e sul

rendering. Termineremo con un approfondimento sull'allestimento di un set fotografico in Blender per testare la resa dei vari oggetti.

### *Ventilazione meccanica non invasiva*

2010-02-13 Stefano Nava La crescita esponenziale dell'interesse per la ventilazione non invasiva (NIV) verificatasi negli ultimi 10-15 anni, non solo dal punto di vista clinico e applicativo, ma anche speculativo, ha pochi eguali nella recente storia della medicina. In Italia e in Europa in generale tale metodica è applicata su larga scala, prevalentemente nei reparti di Pneumologia e nelle Unità di Cure Intermedie Respiratorie, mentre per quanto riguarda la sua applicazione nei reparti di Terapia Intensiva Generale (UTI) i dati emersi da uno studio multicentrico condotto nei paesi francofoni vedono la NIV impiegata in una quantità di casi che rappresenta fino al 50% dei pazienti che richiedono assistenza ventilatoria. Il recente studio EUROVENT ha inoltre dimostrato come la NIV non si limiti alla sua applicazione "acuta", dal momento che circa 25.000 pazienti sono attualmente ventilati "in cronico" a domicilio. Inoltre, si calcola che milioni di cittadini europei soffrano attualmente di disturbi respiratori durante il sonno, e per molti di essi il trattamento medico di prima scelta è rappresentato dalla NIV. Questo libro si propone lo scopo di richiamare l'attenzione sulle più recenti acquisizioni in questo campo, con la speranza di fornire uno strumento valido e maneggevole per la scelta e l'impostazione della migliore modalità di ventilazione.

#### **Mediterranean Climate Variability**

2006-08-22 P. Lionello This multi-authored book provides an updated description of climate variability in the Mediterranean basin, focusing on decadal and centennial time scales and on the results available on the impact of future emission scenarios at regional scale. The authors describes both local physical processes responsible for these variability - such as changes in the surface properties and land use- and global processes - such as changes in the large scale atmospheric circulation associated to global warming, NAO, tropical monsoon and ENSO. Regional climate change issues are also addressed. Mediterranean Climate Variability aims to review the research on this region and to provide at the same time both an introduction and a reference for researchers. It covers topics typical of Climatology, Climate history, Meteorology, Oceanography, Environmental Science but the information here provided would also be useful for research in agriculture, social and economic studies. It is addressed to scientists and students interested in the Mediterranean climate and environment. Some topics have interesting connections to nearby regions: Northern Atlantic, West Africa, central and Eastern Europe. Each chapter will contain a summary meant to provide information to policy makers, researchers from other fields, and in general to a wide audience without a technical expertise on climate. \* Provides an updated analysis of the Mediterranean climate features and guidelines for future research \* Considers both oceanographic and atmospheric aspects \* Analyzes the Mediterranean climate in a global perspective

2013-04-18 Francesco Frascà Nell'ottavo volume di "Corso di programmazione per Android" analizzeremo più approfonditamente i layout XML e il loro utilizzo, per poi passare alla creazione di layout personalizzati e alla gestione di eventi touch. Una prima parte teorica si soffermerà sull'utilizzo dei layout XML e sulla loro composizione classica, analizzando le caratteristiche principali degli elementi che compongono questo utile strumento. L'ampia parte pratica, poi, si concentrerà sullo sviluppo di un'applicazione che mostri come realizzare componenti di interfaccia grafica personalizzati (compound controls e custom view) e come far sì che questi reagiscano a particolari eventi touch. Verrà inoltre introdotto il concetto di localizzazione, con degli esempi pratici che consentiranno di localizzare in una determinata lingua l'app che si sta sviluppando. In appendice, come di consueto, sarà presente il codice completo dell'applicazione progettata e realizzata.

### **The Pope's Daughter**

---

2015-08-06 Dario Fo Lucrezia Borgia is one of the most vilified women in modern history. The daughter of a notorious pope, she was twice betrothed before the age of eleven and thrice married—one husband was forced to declare himself impotent, and another was murdered by Lucrezia's own brother, Cesare Borgia. She is cast in the role of murderess, temptress, incestuous lover, loose woman, femme fatale par excellence. But there are two sides to every story. Lucrezia Borgia is the only woman in history to have served as the head of the Catholic Church. She successfully administered several of Renaissance Italy's most thriving cities, founded one of the world's first credit unions, and was a generous patron of the arts. She was mother to a prince and to a cardinal. She was a devoted wife to the Prince of Ferrara, and the lover of the poet Pietro Bembo. She was a child of the Renaissance and, in many ways, the world's first modern woman. In this richly imagined novel, Nobel laureate Dario Fo reveals Lucrezia's humanity, her passion for life, her compassion for others, and her skill at navigating around her family's evildoings. The Borgias are unrivalled for the range and magnitude of their political machinations and opportunism. Fo's brilliance rests in his rendering their story as a shocking mirror image of the uses and abuses of power in our own time. Lucrezia herself becomes a model for how to survive and rise above those abuses. Part *Wolf Hall*, part *House of Cards*, *The Pope's Daughter* will appeal to readers of historical fiction and of contemporary fiction alike and will delight anyone fascinated by Renaissance Italy.

### **Post-Digital Print**

---

2019-04-23 Alessandro Ludovico Digital technology is now a normal part of everyday life. The mutation of music and film into bits and bytes, downloads and streams is now taken for granted. For the world of book and magazine publishing however, this transformation has only just begun. Still, the vision of this transformation is far from new. For more than a century now, avant-garde artists, activists and technologists have been anticipating the development of networked and electronic publishing. Although in hindsight the reports of the death of paper were greatly exaggerated,

electronic publishing has now certainly become a reality. How will the analog and the digital coexist in the post-digital age of publishing? How will they transition, mix and cross over? In this book, Alessandro Ludovico rereads the history of the avant-garde arts as a prehistory of cutting through the so-called dichotomy between paper and electronics. Ludovico is the editor and publisher of Neural, a magazine for critical digital culture and media arts. For more than 20 years now, he has been working at the cutting edge (and the outer fringes) of both print publishing and politically engaged digital art.

Paloma is a runner. She loves to run. She doesnt run anywhere in particular, mind you, she just enjoys the experience. Sometimes she gets to run in wide open spaces, like at the park, sometimes she runs alongside her moms bike, and sometimes she just runs back and forth through the house. To her, it doesnt much matter, just as long as she gets to run. The way her life started out, however, it was possible that she might never have gotten the chance.

Paloma is a one-year-old half English setter/half English pointer mix. Her name, which is Spanish for "dove," was bestowed upon her because as a very young puppy, she was entirely white. The result of an accidental breeding between two show dogs, Paloma and her six sisters were unexpected and unwanted by the owners of both parent dogs. Fortunately, all seven dogs made their way to a pointer rescue shelter, and have since all found happy homes.

International adopting means that we have to follow the rules and laws of our country and the country that we are adopting from. Every country has conditions like age limits, income guidelines, number of children in the home, marital stability, and gender (single applicants). The steps for an international adoption can be difficult. First you need to decide what country in which you would like to adopt. You should think about the cultural differences and weather or not you can really deal with them. Consider your family and friends, talk with them and ask them what their opinions and thoughts on the matter might be. You might ask them how they might feel about it. You age and marital status will help you know what countries you can adopt from. Once you have done that then you can narrow it down to one.

Once you have chosen a country, you will need to choose an agency that can help you along the way. You should remember when choosing an agency you need to feel comfortable about the people that you will be working with. You also need to make sure that the agencies you are looking at handle international adoptions. Once you have picked your agency it is time to start the paperwork. The agency will assign a social worker to your case. The social worker will

come to your home and interview you and any children in your home. They will also want to interview your friends and family. This is called an international home study.

In sports, there are pundits who oppose using statistics alone to measure a player's performance. They say that these numbers only tell part of the story and fail to capture certain intangible aspects of the game that cannot be quantified. This is particularly true of adoption statistics, which are unfortunately incomplete. There is no one body which tracks adoption statistics, leaving what numbers are available scattered and somewhat outdated. Useful figures can still be found, however, and serve to paint part of the adoption picture.

Perhaps one of the more striking numbers is the number of Americans who are personally touched by adoption in one way or another. A study done in 1997 by the Evan B. Donaldson Adoption Institute found that 60% of Americans had an adoption experience. As defined by the authors of the study, this means that either the participant or one of their family members or close friends had adopted, had placed a child for adoption, or was adopted. Although the research is ten years old, it's still quite interesting, as its findings mean that people who have been affected by adoption compose a majority in the United States.

Another tale is told by examining the demographics of women who place their children for adoption prenatally. As it turns out, the likelihood that a woman will place their unborn child has an inverse relationship with socioeconomic status (SES) and level of education within the birth mother's family. For example, if a woman's mother completed at least one year of college, then she is statistically three times more likely to place a child for adoption than a woman whose mother did not finish high school, according to one study. Researchers explain such trends by claiming that these women come from families which are generally more supportive than those of women from lower SES and educational backgrounds. One California study bucks this trend, however, finding that women who placed their children tended to not have an education beyond high school.

**Opportunity Corso Di Blender Livello 3 Esperto In Un Click** .Bigger is better is believed in by many. That's exactly what some of the small firms think when they want to advertise their product. They think bigger and select a medium where they need to invest a lot of money, but do not reach the targeted market. Like if a company specializes in designing diet plans and want to help out people who had disappointing results from their individual diet plans, and the company chooses to advertise a full page in the local paper instead of running advertisement in a health magazine, obviously not many of the dieters will notice the advertisement and the advertisement doesn't get the desired attention.

So the point is to come up with the best campaign, which will increase the probability of the ad getting viewed and the right customers trying to buy the product or sign up for the service. Studies and research can be carried out on the market and targeted audience can be narrowed down. Once getting the list of newspapers, magazines and magazines meant for the customers in mind, find out how many readers they have and the cost they ask for posting the ad. Special deals are offered by them from time to time and can only be found by watchful eye.

It is estimated that everyday people are subjected to around three thousand commercials. That is a huge number and if someone desires to be noticed, he should certainly be different. Not only the services and product sold should be unique in the market, so should be the advertisement. For example, if a business selling mattresses says, "We sell mattresses", it will not make a statement and will be passed off as any other mattress advertisement. But if they say, "Our mattresses are of the finest quality", it will make the advertisement stand out in the crowd. Other catch lines are "Are you suffering from back pain? Probably you must try our mattresses ", are more specific and will catch the fancy of the people who are suffering from back pains since a long time. The advertisement should also focus on the uniqueness of the product and how it is better compared to the competitors' product.

took days or even weeks. But these days, adventure sailing vacation is gaining popularity and if you are thinking of booking one, you should know what is inclusive in most packages. The price tag of adventure sailing depends on the destination and how long you will be at sea. This person oversees the training of medical staff and is responsible for the actions of the medical team during the transport. A company with such a person on staff has a lot at stake, so quality and standards will be high in such a case.

How many medical professionals accompany the patient during transport? In many situations, an air ambulance service may only send out one medically trained person on each flight. In some instances, this is safe for patients, but if an emergency should occur, it is best to have a minimum of two medically trained personnel on hand to completely handle the emergency situation. The trained staff should have experience in emergency treatment and critical care. In specialized cases, more members should accompany a patient and the number of the team increases. This is true in cases that require a respiratory therapist, for example.

Investigating air ambulance services may seem overwhelming at the time, but knowing that the patients needs should come first is important. Safety of the patient is evident in companies that strive for excellence. Check out the air ambulance company and their safety record for an indication of the companys quality and level of experience before making the final decision.

Using colorful font can multiply the cost to many times and is not worth the return. If the budget is low and the matter is confident enough, black font will be fine. Regular readers read the newspapers daily; therefore, there is no sense in placing the same ad in the same paper everyday. The advertisement can be placed in different papers everyday. The frequency can be three times a week for a particular newspaper. But there is an increase in the number of readers on weekends, so more money can be invested on placing advertisement in the weekend edition. Don't be disappointed if all the advertisement space is sold on weekend. Insert fliers in between the pages of the newspaper.

As many advertisers will be posting their ads on weekends in the local newspaper and the chances of your ad getting lost in the muddle, the conventions can be twisted a little to beat the competition. Place an offer coupon in the mid-week editorial and pay the local station to advertise and talk about the offer on their famous program. Ask them to specifically mention about the coupon placed in the newspaper. Out of the daily readers, only few of them go through the entire newspapers. Most of them view the first and last page. So instead of posting an ad thrice weekly in the middle pages, invest on placing the ad on the first or last page of the newspaper, once a week. Majority of the newspapers don't give competitive protection, that is, an advertisement of a firm can be placed next to the advertisement of its competitor. Specify about this condition to the sales person and take the guarantee from them. There is a decrease in the number of local newspapers every year. In United States, only about a thousand newspapers function on a daily basis. Local people are now relying on weekly papers or newspapers with the local section. Sometimes only one publisher controls many of the local newspapers. Newspapers for all the localities are printed at one place with only the front page being changed. When advertising in such publications, care should be taken on recognizing the audience that is being reached. All the effort and money is wasted if the wrong

customer is reached and the result can go in loss. Mixing different medias instead one for advertising is a smart approach. One can take care of the shortcomings of the other and work in tandem to make the overall advertising campaign a huge success.

After all this exposure, women viewers identify themselves as the weaker sex. Some think that males decide their self-worth. Over exposure of women as sex objects have triggered cases of physical assault and rapes. Majority of the women are taking the wrong way to get those stick figures, which are results in diseases, sometimes leading to death. And most of this is attributed to the advertisements that pour into the lives of innocent people everyday. Marketing ethics should be built to raise the status of woman in the society and give them the due respect but not degrade them.

#### **Writing a good headline for your advertisement**

There is no denying the fact that the success of an advertisement lies mostly in the headline. The headline should attract the reader and make him read the rest of the advertisement. The headline should be simply catchy and various key points should be embedded when deciding on the headline for the ad.

The headline should catch attention of the eye at the first glance. Words in headlines should act as tags for the advertisement. It should say it all about the content that follows. If a company is selling reasonably priced furniture, the headline of their advertisement should be 'Durable furniture for less price'. This headline will attract the right customers who are on a look out for durable furniture as well as low cost furniture. If the customers to be reached belong to a category that are interested in decorating their house with beautiful furniture and aren't concerned about the price to get the right look, then the headline can be 'Change how your house looks by our oriental furniture'. Anything other than the prospects should not be included in the headline. If both men and women can use a product, both of them should be referred to in the title, missing out even one of the category is like losing a huge number of potential customers.
